Description

Lying in the Whitsundays, 'Goin' Troppo' is a 2017 Lagoon 42 exclusively for sale with the YOTI team in Queensland.

'Goin' Troppo' is a fabulous three-cabin, Owner's version, Lagoon 42. Her very knowledgeable and meticulous owners bought her new in the USA (to Australian Spec) and shipped her to Australia in Dec 2019. As a result, her new Owner will have the rare opportunity to purchase a fabulously specified Lagoon 42, fully set up for extended, self-sufficient blue water cruising.

Her interior is in Alpi oak with light 'shark' brown upholstery. The vertical glazing of the coachroof provides excellent visibility and a well-lit, comfortable living environment. We find a comfortable and sizeable L-shaped settee in the saloon with a central mounted table and a bench. The chartable is to starboard, and her U-shaped galley, with induction hob and electric oven/grill, has broad work surfaces with ample storage space and is oriented towards the external cockpit.

All her cabins are ensuite, with large scenic hull windows and overhead opening hatches to ensure ventilation and a tremendous feeling of light and space. The spacious Owner's cabin takes over the starboard hull, which can be closed off with a sliding door. Aft is the island-style double berth, midships a desk, shelves, wardrobes, washer/drier, and forward the large head with enclosed shower. The port aft cabin also features an island berth with an ensuite head and shower. The port forward cabin features a double berth with side access and an ensuite head/shower.

This Lagoon 42 comes with a powerful 'square top' mainsail, a self-tacking jib, a Code 0 with removable furler and an asymmetrical spinnaker in a dowsing sock, guaranteeing performance under sail.

The coachroof bulkhead helm station, with full instrumentation, provides all-around visibility and is well protected by a composite hardtop and clears. The helm station also allows for direct communication to the cockpit/saloon. Her instrumentation consists of a complete B & G package, including twin 12" Zeus plotters, Radar, AIS transponder, autopilot, and forward scan sonar.

"Goin' Troppo" comes with the upgraded 57Hp Yanmar engines, reading just 695 hrs(May 22). The Genset is an Onan 11kw, installed in a soundbox to reduce noise levels. There is also a total of 2000 watts of solar power on the coachroof and custom s/steel arch. A full array of Victron electronics ensure that her Lithium batteries (2021) are charged safely and in the best possible way. Monitoring of the system is by a Victron GX colour touchscreen, interfaced to her B & G Zeus plotters for additional monitoring. Additional specifications include 2 x Mastervolt Isolation transformers, 2 x 2000W Victron Multiplus Inverter/chargers, 48,000btu full vessel reverse cycle Air-Conditioning, Cruise RO 200l/h watermaker, two 130l Fridges and 100l Freezer and a Siemens 8 & 5 kg washer/drier.

Please get in touch with Robert Vrind for further details and arrange an inspection in the Whitsundays.
